Mobile Mini Memory Card Reader AXAGON CRE-DAC with USB 5 Gbps interface supports all current versions of SD and microSD cards including SDXC and microSDXC with capacities up to 2TB.

The big advantage of the reader is both the USB-C and the USB-A connector, so the connection is really universal. The reader can be directly connected to all desktop computers or laptops, as well as to phones and tablets with a USB-C connector.

With USB 3.2 Gen 1 (USB 3.0) interface, the reader achieves significantly higher data rates for UHS-I SD cards compared to USB 2.0 interface readers. The card reader allows simultaneous handling of cards in both slots and direct copying between them.

The metal body of the reader not only looks great, but also increases its durability. The finely structured surface with no fingerprint remains will also please you. Both connectors are protected by carrying caps when carrying them. The included hinge allows the card reader to be attached to a key ring. Installation is easy for everyone, just plug the reader into the USB port of your computer or mobile phone and the rest is done automatically.

Card reader - two slots, supports the following formats:
