Pagrindinės savybės

- ✓ Analoginis / skaitmeninis Orlaivio vairalazdė PC
- ✓ Juoda, Mėlyna
- ✓ Vielinis USB
- ✓ Kabelis

Aprašymas

Get ready for takeoff with the first Thrustmaster joystick to combine magnetic technology with flight controls inspired by the world of civil aviation (the Airbus A320 family).

Innovative, versatile design

- Fully ambidextrous and modular joystick, with 4 swappable joystick head button modules that let you choose between 4 different configurations (right or left seat of an airliner, narrow or wide center stick configuration for small aircraft)
- Ergonomic replica of the Airbus sidestick (A320 type), with built-in throttle axis and thrust reverser mechanism

Native integration in Microsoft Flight Simulator 2020

Plug and play: the device is automatically recognized in the game

Thrustmaster flight product ecosystem compatibility

Compatible with PC (Windows® 10, 8)

Compatible with the following rudder controllers (sold separately): Thrustmaster T.Flight Rudder Pedals (TFRP) and Thrustmaster Pendular Rudder (TPR)

Fly with greater levels of realism and immersion

- Exclusive precision, thanks to H.E.A.R.T (HallEffect AccuRate Technology) magnetic sensors:
- Surgical precision (i.e. 14-bit resolution: 16,384 x 16,384 values!) for the pitch axis and roll axis
- The coil spring (0.1” / 2.8 mm in diameter) inside the stick provides firm, linear and fluid tension
- New locking mechanism lets you disable the joystick handle’s rotation, if used in conjunction with a rudder controller (sold separately)

17 action buttons with “braille”-style identification!

- 12 buttons on the base, 4 on the stick, and 1 virtual button on the throttle (bottom 20% of the axis)
- New 8-direction point of view hat switch, designed for extreme precision

4 independent axes, with twist rudder (controlled by rotating the joystick handle)

Selector switch lets you configure the 12 buttons on the base, in either the right-handed or left-handed position

Weighted base for enhanced stability

Compatible with T.A.R.G.E.T software

Thrustmaster Advanced pRogramming Graphical EdiTor software: load or create specific mapping presets for each aircraft, to extend or save all of your favorite settings.

Techninė specifikacija

Input device	
Device type	Joystick
Gaming platforms supported	PC
Buttons quantity	17
Ports & interfaces	
Connectivity technology	Wired
Device interface	USB
Ergonomics	
Product colour	Black, Blue

Plug and Play	Yes
Power	
Power source	Cable
Software	
Windows operating systems supported	Windows 10, Windows 8
Technical details	
Quantity per box	1 pc(s)
Weight & dimensions	
Weight	920 g
Packaging data	
Package width	198 mm
Package depth	208 mm
Package height	240 mm
Package weight	900 g
Logistics data	
Country of origin	China
Harmonized System (HS) code	8471607000
Matmenys ir svoris	
Matmenys (I × P × A)	21,00cm × 20,00cm × 24,00cm
