

# HPE Aruba MM- VA-500 Mob Mstr SW E-LTU

Modelis: JY895AAE

Gamintojas: HEWLETT PACKARD ENTERPRISE

EAN: 190017130637

Prekės kodas: 49474

## 8,722.99€

Aruba Virtual Mobility Master software is the next generation of master controller that can be either deployed as a virtual machine (VM) or installed on an x86-based hardware appliance. The Mobility Master provides a better user experience, flexible deployment models, simplified operations and enhanced performance. Aruba Mobility Master is deployed as a virtual machine (VM) for more memory and compute power to address today's technology needs for mobility and IoT. It provides automatic RF optimization for high-density environments and enables hitless failover in an unlikely event of a controller outage.

Product Description: HPE Aruba Virtual Mobility Master - licence - up to 500 access points and MCs total | Product Type: Licence | Category: Online & appliance based services - appliance software | Licence Qty: Up to 500 access points and MCs total | Licensing Details: ESD
