high-quality IPS panel.

USB-C Connectivity and Power Delivery (70W)

Simplify your desktop setup with the versatile USB-C connection. A single cable transmits high-definition 4K video signals, provides access to the integrated four-port USB hub for peripherals, and simultaneously charges connected notebooks with up to 70 watts of Power Delivery (PD). This streamlined solution ensures a clean, cable-managed workspace and optimal charging for compatible devices.

Optimized Performance and Professional Features

- **4K UHD IPS Panel:** Enjoy consistent color reproduction and ultra-wide 178° viewing angles across the high-resolution 27-inch screen.
- **Exceptional Energy Efficiency:** Despite its high resolution and screen size, the EV2740S features a typical power consumption of only 12 watts, reducing operational costs and minimizing environmental impact.
- **Picture-by-Picture (PbyP):** Easily display content from two separate signal sources simultaneously side by side on the single screen, ideal for comparison tasks or multi-system operation.
- **Integrated USB Hub:** Built-in USB 3.2 Gen 1 hub facilitates easy connection for keyboards, mice, and other accessories directly to the monitor.
- **Flicker-Free Viewing:** Designed for eye comfort, the display ensures a flicker-free experience suitable for long working hours.

Commitment to Sustainability

The FlexScan EV2740S demonstrates EIZO's dedication to environmental responsibility. It meets rigorous global sustainability standards, including TCO Certified Generation 10, ENERGY STAR®, and holds the highest level EPEAT Gold award, along with EPEAT Climate+ certification, ensuring you choose an eco-conscious display solution.

EIZO is globally recognized for manufacturing high-end visual display solutions known for reliability, unparalleled image quality, and ergonomic excellence in professional environments.

The EV2740S has all the features you need for a crisp, clear, and flicker-free display. With 4K UHD resolution, it displays four times as much information as standard Full HD (1920 x 1080) resolution. This means users can see more information at once on the 27-inch screen, reducing the need to scroll or switch between hidden windows. Although 4K monitors typically require more power due to their higher resolution and larger screen size, the EV2740S boasts a typical power consumption of just 12 watts. This helps companies reduce energy costs and minimize their environmental footprint. Like all EIZO 4K monitors, the EV2740S is equipped with a USB-C port. This transmits the video signal, provides access to the monitor's USB hub with four ports for peripheral devices, and delivers up to 70 watts of power—all with just one cable between the notebook and the screen. In Picture-by-Picture (PbyP) mode, the monitor displays images from two signal sources side by side. The EV2740S is certified to comprehensive global sustainability standards, including TCO Certified generation 10 and the ENERGY STAR® label. The EPEAT Gold award, the highest level, and EPEAT Climate+ underscore EIZO's commitment to sustainability.
