applications. Whether you are battling in the latest AAA titles or accelerating video editing projects, the RTX 5050 provides the necessary power and reliability.

Optimized Cooling and Design

The Twin X2 cooling solution is engineered by INNO3D to maintain optimal operating temperatures even under intense loads. Featuring a dual-fan setup, this system effectively dissipates heat, ensuring stable performance and longevity while keeping noise levels low. The compact design makes this card suitable for a wide range of chassis sizes.

Key Performance Features:

- Powerful NVIDIA GeForce RTX 5050 chipset for exceptional graphical processing.
- 8192 MB (8GB) of high-bandwidth GDDR6 memory for demanding games and creative tasks.
- Efficient INNO3D Twin X2 dual-fan cooling system for stable, quiet operation.
- Ideal performance upgrade for mainstream 1080p and 1440p gaming experiences.

INNO3D is a recognized manufacturer of high-quality NVIDIA-based graphics solutions, known for combining cutting-edge technology with reliable cooling and robust build quality. Their products cater to performance enthusiasts and serious gamers globally.
