Next-Generation Performance and Design

The RTX 5070 is equipped with a massive 12 GB of ultra-fast GDDR7 memory, providing the necessary bandwidth for 4K resolutions and intensive texture workloads. Optimized with a factory overclock (OC), this Twin X2 model delivers enhanced performance right out of the box, pushing your system to new limits while maintaining stability.

Key Features:

- **12 GB GDDR7 Memory:** High-speed video memory optimized for next-generation gaming and demanding applications.
- **Factory Overclocked (OC):** Enhanced core speeds for superior gaming performance and increased frame rates.
- **Twin X2 Cooling System:** Efficient dual-fan thermal solution designed by INNO3D to dissipate heat quickly, ensuring quiet operation under load.
- **Striking White Aesthetic:** Features a sleek white shroud and backplate, perfect for modern, clean PC builds and customized setups.
- **NVIDIA Architecture Benefits:** Access advanced features like accelerated Ray Tracing for realistic lighting and shadows, and performance-boosting technologies.

The INNO3D Twin X2 design combines powerful cooling capability with a compact form factor, making it suitable for a wide range of chassis sizes. Its distinctive white color scheme offers a clean, premium look that enhances the visual appeal of any gaming rig.

INNO3D is a trusted manufacturer specializing in high-quality NVIDIA-based graphics solutions, known for their focus on effective cooling, reliability, and value. Their commitment to innovation ensures gamers and creators receive robust performance components.

Order today from ++SHOP++ as we offer the best deals and reliable delivery on all INNO3D components.
