

# Graphics Card PALIT NVIDIA GeForce RTX 5080 GamingPro OC 16GB GDDR7 256-bit PCI Express 5.0

Modelis: NE75080S19T2-GB2031A

Gamintojas: PALIT

EAN: 4710562244922

Prekės kodas: 503921

## 1,761.99€

## Graphics Card PALIT NVIDIA GeForce RTX 5080 GamingPro OC

The Palit GeForce RTX 5080 GamingPro OC is a high-performance graphics card designed for gamers, creators, and AI professionals who demand both style and substance. Featuring the cutting-edge NVIDIA architecture and 16GB of ultra-fast GDDR7 memory, this card delivers exceptional

frame rates and stunning visuals at the highest resolutions. The industrial-inspired design is complemented by vibrant ARGB accents that can be easily synchronized with your system.

## Advanced Cooling Technology

To maintain peak performance under heavy loads, the GamingPro series utilizes an advanced thermal solution. The TurboFan 4.0 system, inspired by aircraft wing designs, optimizes airflow and minimizes noise. Combined with a customized Vapor Chamber and composite heat pipes, the card ensures efficient heat dissipation from the GPU and VRAM, allowing for stable overclocking and long gaming sessions.

## Key Features:

- **TurboFan 4.0:** Optimized airflow dynamics with winglets to reduce drag and noise.
- **Vapor Chamber:** Custom-fitted to thermal hotspots for rapid heat transfer to the heatsink.
- **16GB GDDR7 Memory:** Next-generation high-speed memory on a 256-bit bus for massive bandwidth.
- **Dual BIOS:** Switch between Performance Mode for maximum cooling or Silent Mode for quiet operation.
- **0dB Technology:** Fans remain completely silent during light workloads, activating only when the temperature rises.
- **PCI Express 5.0:** Future-proof connectivity for maximum data transfer speeds.
- **ARGB Lighting:** Universal 5V connector for effortless synchronization with your PC setup.

## Enhanced Build Quality

The card features a redesigned die-casting frame that provides superior anti-bending protection and a premium feel. With IP5X dust resistance and server-grade digital PWM, the Palit RTX 5080 is built for long-term reliability and precise power delivery. Users can also utilize the ThunderMaster utility for full control over overclocking, fan speeds, and LED effects.

**PALIT** is a leading manufacturer of high-performance graphics cards, recognized globally for innovation and reliability in the gaming hardware industry.

Order today from ++SHOP++ as we offer the best deals and fastest delivery for premium gaming components.

## GamingPro: Pure Performance with Style

The Palit GamingPro Series merges sleek, industrial design with robust performance.

Its ARGB accents and advanced cooling solutions—featuring TurboFan 4.0, Air Deflector, and Composite Heat Pipes—ensure optimal thermal efficiency. Features like dual BIOS, 0dB technology, and a die-casting frame enhance its performance flexibility and board reliability. With Palit Maker support, users can easily customize the cooler cover via 3D printing.

Balancing functionality and style, it's an ideal choice for gamers, creators, and AI professionals.

Inspired by jet engines and aircraft wings, TurboFan 4.0 optimizes airflow dynamics for outstanding cooling efficiency.

With winglets that stabilize airflow and grooves on the blade backs to reduce drag and noise, TurboFan 4.0 channels air smoothly toward the heat sink. This design achieves a total of 33% boost in noise and thermal optimization.

The 30° fin angle guides the airflow precisely across the surface, maximizing contact with the fins for a total of 16% noise and airflow optimization. This enhancement allows for smoother, more effective heat dissipation.

The Composite Heat Pipe leverages two advanced techniques—grooved and sintered powder structures—that work in harmony to enhance thermal efficiency.

An optimal copper powder composition is applied to boost the heat dissipation by up to 32%, ensuring your GPU maintains peak performance even under high-power scenarios.

Through rigorous testing, the Vapor Chamber is customized based on each GPU's thermal hotspots and heat pipe layout to achieve ideal thickness for optimal performance.

Fully covering the GPU and VRAM, the VC spreads heat evenly across the surface, ensuring rapid transfer to the heatsink and maintaining peak performance under demanding conditions.

## **Plug and Play. Shine in Harmony.**

The universal 5V ARGB connector makes lighting synchronization effortless. Simply plug and play to sync your board's lighting with the rest of your PC—no additional software needed.

The die-casting frame is redesigned to a full-cover version, now 3.6 times larger for comprehensive protection.

Its rounded corner design perfectly matches the board shape, providing anti-bending durability and a premium feel.

The digital PWM, the IC component commonly used in server-grade hardware, is integrated into our graphics cards.

This technology enables flexible voltage control and minimizes interference, optimizing power delivery.

## **Enhanced Durability and Stability**

The Dual-Ball Bearing system delivers reinforced stability and durability.

- IP5X Dust Resistance: Shields against dust for reliable long-term performance.
- Reduced Vibration: Minimizes fan movement for quieter operation.
- Extended Lifespan: 50% improved fan lifespan compared to sleeve ball bearings.

## **Dual BIOS**

The Dual BIOS technology provides automatic protection and performance flexibility.

Performance Mode: Prioritize peak performance with aggressive fan curves for optimal cooling.

Silent Mode: Prioritize quiet operation with a less aggressive fan curve.

## **Silent Performance When It Matters**

The fans remain off during lighter tasks, delivering a silent operation. They activate only when needed.

Activation Conditions: GPU reaches ~60°C, or TGP exceeds ~150W

Deactivation Conditions: GPU drops below ~50°C, memory below ~80°C, and TGP below ~60W

Palit's new ThunderMaster has thorough upgrade from the previous version. It has more user-friendly interface as well as more personalized settings. With ThunderMaster, you can control your video card from overclock setting, fan speed to LED effect. You can also monitor GPU status with ThunderMaster utility.

Summary: Palit GeForce RTX 5080 GamingPro OC. Graphics processor family: NVIDIA, Graphics processor: GeForce RTX 5080, Processor frequency: 2295 MHz. Discrete graphics card memory: 16 GB, Graphics card memory type: GDDR7, Memory bus: 256 bit. Maximum resolution: 7680 x 4320 pixels. DirectX version: 12 Ultimate, OpenGL version: 4.6. Interface type: PCI Express 5.0.
