Aprašymas

Exceptional performance, ultra-fast data transfer and support for up to 8K resolution. One of the most powerful docking stations on the market!

Crystal clear image quality, super-fast internet, and the ability to transfer data at speeds of up to 4 GB per second thanks to the integrated Thunderbolt” 4 output port. You can also, of course, connect your headphones or audio and charge your laptop (92W), all using one single cable.

Thanks to the integrated DP 1.4 protocol, you can connect this dock to a monitor with a resolution of up to 8K (7680 x 4320) with a refresh rate of 30 Hz, which is equivalent to the resolution of four monitors, each at 4K resolution. This makes it the ideal solution for graphic designers, analysts, developers, film editors, or high-definition video enthusiasts and lovers.

The dock is now compatible not only with Thunderbolt” 4 ports, but also USB-C*, making it a flexible solution for businesses and users who run laptops and tablets with different ports.

* Only one (4K/60 Hz) monitor is supported when connected to USB-C.
