Pagrindinės savybės

- ✓ SODIMM form factor
- ✓ supply voltage: 1.1 V
- ✓ frequency: 5600 MHz
- ✓ lifetime warranty + technical support

Aprašymas

Let your laptop keep up with your skill

There is no room for hesitation in the game. Not when the map is loading. Not when you are streaming, using voice chat and keeping several browser tabs open in the background. And definitely not when a single second decides whether you take control of the match or watch the respawn screen.

Goodram RIVAL DDR5 SODIMM is memory designed for gaming laptops that need to run fast, stable and without compromise. With 5600 MHz frequency, CL40 latency, graphene cooling, and support for PMIC and SPD HUB technologies, it helps maintain smooth performance even when the system is under heavy load.

When the pressure is on, your gear can't slow down

Every gamer knows this moment. The round begins. You switch quickly between the game, messenger and stream. The system is running under full load, and the laptop needs to keep up with the pace of gameplay.

Goodram RIVAL DDR5 SODIMM was designed exactly for these scenarios. For mobile setups that work hard for hours. For gaming laptops where it's not only FPS that matters, but also stable performance, system responsiveness and comfort during multitasking.

Because when reflexes and focus make the difference, the last thing you need is hardware holding you back
5600 MHz - speed you can feel in game

The memory operates at 5600 MHz, supporting faster laptop performance both in games and during everyday multitasking. Shorter system response times, smoother switching between applications and more stable performance under load all translate into a more comfortable experience across your entire setup.

This is not just a spec for the table. Higher memory performance has a real impact on how fast your laptop responds - especially when you are gaming, chatting with friends, recording gameplay or working across multiple applications at the same time.

Your laptop should keep up with you. Not the other way around.

Graphreeze - cooling designed for gaming laptops

A gaming laptop is an environment where every degree matters. Limited space, high load and long sessions require solutions that help maintain stable component performance.

That is why Goodram RIVAL DDR5 SODIMM uses an ultra-thin graphene heatsink and Graphreeze technology, supporting efficient heat dissipation without taking up additional space inside the laptop.

This solution was designed for intensive use: long gaming sessions, demanding workloads and dynamic multitasking. When temperatures rise, the memory is built to keep working in a stable and predictable way.

Because in the decisive moment of a match, you need to stay focused — not fight your hardware.

Techninė specifikacija

Features	
Internal memory	32 GB
Memory layout (modules x size)	1 x 32 GB
Internal memory type	DDR5
Memory data transfer rate	5600 MT/s
Component for	Laptop
Memory form factor	262-pin SO-DIMM
ECC	No
Technical details	
How to use	Goodram RIVAL DDR5 SODIMM modules are covered by a lifetime warranty and manufacturer technical support.
Other features	
Certification	CE
Matmenys ir svoris	
Matmenys (I x P x A)	5,00cm x 16,00cm x 1,00cm
Svoris	0,02kg
