Aprašymas

The external AXAGON EEM2-SD2 DISPLAY box with a USB 10Gbps interface is designed for M.2 NVMe or SATA SSD drives. Reliable connection to a computer is ensured by a reversible USB-C connector on the box. The package includes not only a USB-C -> USB-C cable for connecting the box to a computer, but also a USB-C -> USB-A adapter. This way, you can connect the box to any available USB port on your notebook.

The box is equipped with an advanced LED display that provides an instant overview of your drive's status. It offers several display modes, including detection of the connected drive, the file system used, temperature, drive health, data transfer speed, and operating hours. A detailed graph allows real-time monitoring of the drive’s temperature, while the sleep mode saves power when idle. With this intelligent monitoring, you will always have your drive under control – simply, clearly, and efficiently.

Thanks to the USB 3.2 Gen 2 interface, the transfer speed is up to 10 Gb/s. The external M.2 box also supports other modern features such as UASP, TRIM, and allows reading of S.M.A.R.T. information monitoring the condition of the drive. A unique feature, thanks to the used chipset, is the possibility to use both M.2 NVMe and SATA drives. You don’t have to think about which type of M.2 drive to insert into the box. The box allows mounting of SSD cards in three different lengths – 42, 60 and 80 mm. M.2 cards can be single-sided or double-sided, and the box does not limit the capacity of the inserted SSD drive.

Screwless box opening makes installation and removal of the M.2 SSD drive easier. Drive replacement is quick and simple, expanding the possible uses of the box, e.g., for data migration, testing, etc. The external metal casing is finished in gray with an elegant surface that prevents unwanted fingerprints. The aluminum body of the box and the thermal pad ensure ideal cooling of the inserted M.2 SSD drive. This extends its lifespan and also prevents speed throttling, known as Thermal Throttling.

By inserting an M.2 SSD drive into this box, you can easily create a fast, compact, and universal external drive that can be used not only with computers and notebooks but also with mobile phones and tablets.

Input:
• USB 10Gbps (USB 3.2 Gen 2), USB-C female connector.
• Compatible with USB 5Gbps, USB 20Gbps, USB4, and Thunderbolt 3/4/5.

Supported Devices:
• NVMe M.2 SSDs,
• SATA M.2 SSDs,
• designed for M key and B+M key card formats,
• NGFF 75-pin M key slot for M.2 drives.

LED display shows:
• Recognizing - disk recognition (displayed when the box is connected to a device)
• Partition - displays the file system, size, and system name of the disk
• Idle - inactivity (information about the disk - used interface and disk size, speed of the connected bus, partitioning standard of the disk)
• Disk info - displays information about the disk (manufacturer label of the disk, actual disk temperature, health, amount of written / read data, total running time of the disk, number of disk removals without using safe removal)
• Monitor – real-time disk temperature using a graph
• Rd/Wr - data transfer (during data transfer, it is possible to switch between sections)
• Sleep - disk sleep mode
