CLR-M2L6 heatsink for M.2 SSD

Passive aluminum heatsink for all M.2 SSDs, size 2280, high 6 mm.

AXAGON CLR-M2L6 ALU passive heatsink for ideal cooling of high performance M.2 SSDs, especially NVMe.

The universal passive heatsink can be used for M.2 cards, size 22 x 80 mm. Two supplied thermally conductive pads allow cooler installation for all one-sided as well as double-sided M.2 SSD disks.

6mm high ribbed aluminum heatsink assists in a better dissipation of heat generated during the M.2 SSD operation. It also reduces the drive temperature by up to 20°C. This prolongs the M.2 SSD life and prevents disk slow down, so-called "Thermal Throttling".
