

SILICON POWER US75 2TB SSD M.2 2280 PCIe Gen4x4 with heatsink 7000/6500 MB/s

Modelis: SP02KGBP44US75S5

Gamintojas: SILICON POWER COMPUTER &
COMMUNICAT

EAN: 4713436164067

Prekės kodas: 559715

356.99€

The SILICON POWER Xpower US75 is designed to deliver performance for demanding applications, thanks to its rapid internal data rate of 7000 MBps. This internal solid state drive comes in an M.2 2280 form factor, making it compatible with a range of devices. With features like LDPC error correction, RAID readiness, and Host Memory Buffer (HMB), it ensures data integrity and reliability for crucial files. Furthermore, the drive supports NVMe Express (NVMe) 2.0, enabling faster data access and improved efficiency in computing tasks.
