

SILICON POWER XS75 2TB SSD M.2 2280 PCIe Gen4x4 7000/6500 MB/s

Modelis: SP02KGBP44XS75S5

Gamintojas: SILICON POWER COMPUTER &
COMMUNICAT

EAN: 4713436164098

Prekės kodas: 559717

374.99€

The SILICON POWER Xpower XS75 is designed to elevate storage performance. Featuring an internal data rate of 7000 MBps, it ensures swift data access, making it ideal for gamers and professionals. This solid state drive is built with 3D NAND technology and supports NVM Express (NVMe) 2.0, contributing to high data transfer rates and improved performance efficiency. Equipped with an integrated heatsink, the XS75 operates efficiently under demanding conditions, with a temperature range from 0°C to 70°C for operation and -40°C to 85°C for storage. Enhanced with features such as LDPC error correction and RAID readiness, this internal hard drive maintains data integrity and reliability over time, supporting a mean time between failures of 1,500,000 hours. With a compact M.2 2280 form factor, it fits seamlessly into most setups while providing storage capabilities.
