The GIGABYTE UD1000GM PG5 V2 ICE power supply delivers reliable and efficient performance for a variety of computing needs. With a robust output of 1000 W, this power supply ensures that your system runs smoothly, even under heavy loads. Equipped with multiple modular cables, including 8 pin PCI Express and SATA connectors, it provides flexibility for customized builds while reducing cable clutter inside the case. Designed for longevity, this power supply boasts a mean time between failures (MTBF) of 100,000 hours, meaning it is built to withstand the test of time. Enhanced features such as overheat, overcurrent, and short-circuit protection ensure safety and stability during operation. Additionally, the active Power Factor Correction and 80 PLUS Gold certification ensure energy efficiency, resulting in lower power consumption and cost savings over time.
