

GIGABYTE GP-UD1000GM PG5 V2 1000W PSU

Modelis: GP-UD1000GM PG5 V2

Gamintojas: GIGABYTE

EAN: 4719331556112

Prekės kodas: 559721

131.99€

The GIGABYTE UD1000GM PG5 V2 power supply is designed to deliver performance and reliability for demanding systems. With an output of 1000 watts, it meets the power needs of high-end components and delivers stable voltages of +3.3V, +5V, $\pm 12V$, and +5VSB. This power supply features a fully modular design that allows for easy cable management, helping to reduce clutter and improve airflow inside the case.

Equipped with a robust cooling system, the 120 mm fan operates efficiently, featuring a Zero RPM fan mode that minimizes noise during low load situations. Built to last with a mean time between failures (MTBF) of 100000 hours, the UD1000GM PG5 V2 adheres to several compliance standards including ATX12V 3.1 and EPS12V. The 80 PLUS Gold certification ensures low power consumption and increased efficiency, making it a choice for both gaming and professional setups.
