The GIGABYTE UD750GM PG5 V2 ICE power supply combines specifications and features to deliver a reliable and efficient power solution for high-performance systems. With a power output of 750 W and a 90% efficiency rating, this power supply meets the demands of modern gaming rigs and workstations. Its fully modular design allows for easy cable management, helping to reduce clutter and improve airflow within the case.

Equipped with a variety of connectors including the 16-pin PCIe 5.0 cable and multiple detachable cables such as the 8-pin PCI Express and 15-pin SATA power, the UD750GM PG5 V2 ICE ensures compatibility with a wide range of components. Additionally, with a hydraulic bearing cooling fan and Smart Fan Control Quiet technology, the power supply maintains a cool operating temperature while running quietly, enhancing the overall performance of your build.
