

GIGABYTE GP-UD850GM PG5 ICE 850W PSU

Modelis: GP-UD850GM PG5 ICE

Gamintojas: GIGABYTE

EAN: 4719331556457

Prekės kodas: 559723

121.99€

The GIGABYTE UD850GM PG5 V2 ICE power supply unit delivers reliable performance and efficiency for various PC builds. With a power output of 850 W, it ensures stable and dependable power delivery to all components, while its 80 PLUS Gold certification reflects high energy efficiency during operation. Designed with a fully modular cable management system, this power supply aids in easy installation and tidy cable organization for a clean build. Equipped with extensive safety protections such as overheat, overcurrent, overvoltage, overpower, undervoltage, and short-circuit protection, the UD850GM PG5 V2 ICE ensures the safety of your components. The unit features a powerful 120 mm hydraulic bearing cooling fan that operates in Zero RPM mode under low loads, reducing noise levels and promoting a quiet computing experience. With a robust MTBF of 100,000 hours and compliance with several standards like TUV, FCC, and RoHS, this power supply is built for reliability and longevity.
