The MSI MAG A650BN PCIE5 II is designed to provide reliable power for PCs and servers with a robust 650 watt output. Its compliance with PCIe 5.1 and ATX12V 3.1 standards ensures versatility and compatibility with modern systems. Featuring an active Power Factor Correction (PFC) and a 85% efficiency rating, this power supply unit minimizes energy waste for a more sustainable operating experience. Equipped with a 120 mm fan for effective cooling, it includes a hydraulic bearing cooling fan for quiet operation. Additionally, comprehensive safety features such as overcurrent protection, short-circuit protection, and undervoltage correction make it a dependable choice for demanding users. With a range of cable options including 16-pin 12VHPWR, 8-pin PCI Express, and 15-pin SATA cables, installation is simplified and organized to meet the needs of advanced setups.
