253.99€

The MSI PRO X870E-S EVO WIFI motherboard delivers performance and versatility for both gaming and professional applications. With support for AMD Ryzen processors and DDR5 memory, it provides fast speeds and ample expansion options for users looking to build or upgrade their systems. This motherboard is designed with high-definition audio capabilities, enhanced connectivity, and advanced thermal management features, ensuring a smooth experience whether for gaming, content creation, or heavy multitasking.

Equipped with multiple USB ports, including USB-C 3.2 Gen 2x2 and USB4, it offers high-speed data transfer and flexibility. The PCIe 5.0 and PCIe 4.0 slots allow for future expansion with new graphics cards and SSDs. Furthermore, the motherboard's durable construction and features like MSI Steel Armor and EZ M.2 Shield FROZR contribute to reliable performance suitable for prolonged use.
