The MSI MAG A750BN PCIE5 II power supply is designed to deliver robust performance for both PCs and servers. With a power output of 750 watts and compliance with ATX12V 3.1 and EPS12V standards, this power supply ensures reliable operation even under heavy workloads. The 120 mm fan cooling system, featuring hydraulic bearing technology, helps maintain optimal temperatures while providing airflow for efficient performance.

Equipped with multiple power connectors, including a 24-pin ATX, 8-pin EPS12V, and 12+4-pin PCI Express 5.1, the MSI MAG A750BN offers extensive compatibility with various components. This power supply also incorporates protective features such as overpower, overcurrent, short-circuit, overvoltage, and undervoltage protection, ensuring the safety of your system during operation.
