

SILICON POWER DDR4 16GBx1 1Gx8 3200MHz C16 OC-UDIMM DR w/HS-G

Modelis: SP016GXLZU320BSI

Gamintojas: SILICON POWER COMPUTER &
COMMUNICAT

EAN: 4713436159414

Prekės kodas: 559972

161.99€

Silicon Power's XPOWER Pulse memory kit is designed to meet the needs of gamers and high-performance computing enthusiasts. Offering 16 GB of DDR4 SDRAM, this memory kit ensures ample capacity for multitasking and demanding applications. With a memory speed of 3200 MHz and a CAS Latency of CL16, it provides a boost in data processing speed, reducing latency and enhancing system responsiveness. The inclusion of Intel Extreme Memory Profiles (XMP 2.0) allows for easy overclocking and performance optimization, making it a versatile choice for various computing environments. Operating at a low supply voltage of 1.35 V, it also prioritizes energy efficiency, contributing to a cooler and more sustainable system operation. Whether you're gaming, creating, or computing, the XPOWER Pulse memory kit offers a reliable and powerful upgrade to your setup.
