233.99€

The GIGABYTE AORUS B850 ELITE WIFI7 ICE motherboard is designed to deliver high-performance computing for gamers and creators. With support for Ryzen 7000/8000/9000 Series processors and capable of accommodating DDR5 SDRAM, it ensures your system can handle demanding applications with ease. The motherboard features a 14+2+2 Phase Power Design for efficient power delivery, alongside a dual-channel memory architecture that enhances system responsiveness. Equipped with various connectivity options, including 2.5 Gigabit Ethernet and Wi-Fi 7, this motherboard provides reliable network performance for seamless online gaming and streaming. Multiple USB ports, including USB-C 3.2 Gen 2, allow for versatile peripheral connections, while the M.2 EZ Latch features simplify the installation of high-speed storage devices. With advanced hardware monitoring capabilities, users can track system temperatures, voltages, and fan speeds, ensuring optimal performance during intense tasks.
