Prekės kodas: 560016

190.99€

The Sapphire NITRO+ B850A WIFI 7 motherboard is designed for those seeking robust performance and versatile connectivity options. Ideal for building a powerful gaming or workstation PC, this motherboard supports AMD Ryzen 7000/8000/9000 Series processors with its Socket AM5. With four DIMM slots for DDR5 SDRAM, it offers support for high-speed memory up to 8000 MT/s, ensuring smooth multitasking and efficient processing power.

Networking capabilities are enhanced with integrated 2.5 Gigabit Ethernet and Wi-Fi 7 support, providing fast and reliable Internet connectivity. The motherboard is equipped with a suite of audio features, including high-definition audio through a Realtek ALC897 codec, ensuring an immersive audio experience for gaming and media consumption. Additionally, a range of I/O options, including multiple USB ports and M.2 sockets, makes it an excellent choice for expansion and peripheral connectivity.
