

GIGABYTE B840 GAMING X WF6E

Modelis: B840 GAMING X WF6E

Gamintojas: GIGABYTE

EAN: 4719331876937

Prekės kodas: 560032

179.00€

The GIGABYTE B840 GAMING X WIFI6E motherboard enhances your gaming experience and offers robust performance with various compatible processors, including the Ryzen 7000, 8000, and 9000 Series. Built with the AMD B840 chipset, this ATX form factor motherboard supports DDR5 SDRAM with speeds up to 7200 MT/s and features four DIMM slots, allowing for increased memory capacity and dual-channel architecture. It includes advanced BIOS features such as UEFI BIOS and hardware monitoring for system voltage, fan control, and temperature detection, ensuring performance and reliability during intense gaming sessions.

Connectivity is a highlight, with integrated Wi-Fi 6E for fast wireless communication and a 2.5 Gigabit Ethernet port for stable wired connections. The board provides multiple USB interface options, including USB-C and USB 3.2, for high-speed data transfer. Exceptional hardware features include an ultra-durable design, PCIe EZ Latch for easy component installation, and M.2 Thermal Guard to keep storage devices cool. Experience gaming and productivity with the GIGABYTE B840 GAMING X WIFI6E motherboard, which combines performance, connectivity, and durability for an enhanced computing experience.
