

GIGABYTE H810M S2H GEN5 LGA1851 1xHDMI 1xDP

Modelis: H810M S2H GEN5

Gamintojas: GIGABYTE

Prekės kodas: 560081

114.99€

The GIGABYTE H810M S2H GEN5 motherboard offers a solid foundation for Intel Core Ultra processors, supporting DDR5 SDRAM with speeds up to 6400 MT/s. With its micro ATX form factor, it is designed for efficient use of space while delivering performance. This motherboard features AMD-approved high-definition audio for an immersive sound experience, alongside multiple display outputs including HDMI and DisplayPort to connect various monitors easily. Expansion is facilitated with 2 DIMM slots, a PCIe 5.0 x16 slot, and a 2280 M.2 Key M slot, enabling users to customize their systems according to their needs. With built-in Gigabit Ethernet and multiple USB options, including USB-C 3.2 Gen 1, users can enjoy fast networking and versatile connectivity. The motherboard includes advanced hardware monitoring features such as fan control and system voltage detection, ensuring reliable performance under various workloads. With a DIY-friendly design and RGB FUSION support, the GIGABYTE H810M S2H GEN5 brings together functionality and aesthetic appeal for both casual and dedicated users alike.
