

GIGABYTE GP- GME750GM 750W PG5 PSU

Modelis: GP-GME750GM PG5

Gamintojas: GIGABYTE

EAN: 4719331557140

Prekės kodas: 560086

124.99€

The GIGABYTE GAMING 750GM PG5 is a reliable power supply designed to support high-performance systems. With a power output of 750 W, it ensures stable and efficient operation for PC and server applications. This power supply features an active Power Factor Correction (PFC) for minimizing energy loss, achieving an efficiency of 90% and possessing an 80 PLUS Gold certification. The fully modular design allows for flexible cable management, helping to reduce clutter and improve airflow within the case.

Safety features are a priority with this power supply, incorporating multiple protections including overvoltage protection, short-circuit protection, and overheat protection. The 135 mm fan with fluid dynamic bearing provides efficient cooling while maintaining low noise levels. With an MTBF of 100,000 hours, the GIGABYTE GAMING 750GM PG5 is engineered for longevity and dependable performance, making it an ideal choice for gamers and professionals alike.
