Aprašymas

Small but very powerful metal USB-C docking station capable of supporting up to three external monitors simultaneously*. Simply connect your laptop or tablet (no need to install drivers) and reap the benefits of quick USB data transfer, connection to the internet via a LAN port, and the ability to connect your headset. And of course, the docking station can also power your laptop with up to 140 W **, meaning you will be able to charge all laptops and tablets that support charging via USB-C (USB-C Power Delivery).

Brushed aluminium body grants the docking station sufficient durability and resilience even during frequent travel. The integrated USB-C cable is sufficiently long for comfortable connection even if the USB-C port is located in the upper portion of the screen frame (typical for hybrid laptops/tablets).

The docking station is also fully compatible with tablets and laptops featuring a modern Thunderbolt port.
