FREEWELL filter set for DJI Mavic 4 Pro ND/PL Bright Day (4pcs)

Freewell ND/PL Bright Day filters are designed for recording in bright sunlight, where exposure control and glare elimination are crucial. They will also work well at a variety of focal lengths and apertures. Split ND/PL filters (ND8PL/ND4PL, ND16PL/ND8PL, ND32PL/ND16PL, ND64PL/ND32PL) are included, combining an image-dimming function with polarization to provide greater control over exposure and allow for smooth, professional shots even in very bright light.

Improved material quality

With polarization, the filters effectively reduce light reflections and boost color saturation, resulting in more dynamic, high-contrast footage – especially in landscape shots. Lightweight and durable
