

Intelligent switchboard SwitchBot Hub 3

Modelis: W7202100

Gamintojas: SWITCHBOT

EAN: 810150546064

Prekės kodas: 560404

120.00€

SwitchBot Hub 3 smart control panel

SwitchBot Hub 3 is a state-of-the-art Matter control panel that connects all devices in one ecosystem. With Matter protocol support, it works with Apple Home, Home Assistant, Amazon Alexa and Google Home. One hub is enough to control both SwitchBot hardware and up to 30 other Matter-compatible devices - from light bulbs and blinds to sensors and locks.

Full control from the app and physical buttons

From the app, you can create automation scenes, group devices and control them with a single touch. Hub 3 also allows you to quickly manage your four favorite scenes with programmable buttons - such as "Goodnight," "Out," and "Relax."

IR remote control and bridge for the whole house

The device acts as an advanced infrared remote control, supporting more than 101,000 IR codes. It allows you to control your air conditioner, TV, projector or audio equipment. It also acts as a bridge for 30 Matter devices, offering a range of up to 200 meters in open spaces and faster response thanks to increased memory.

Temperature, humidity and light sensors

Built-in sensors monitor conditions in real time, displaying data on the IPS screen. When paired with the SwitchBot Meter Pro CO₂, you also gain control over carbon dioxide levels to maintain a healthy indoor climate.

Notifications and safety

SwitchBot Hub 3 will let you know when a door is open, act as a timer with alarm and lock status display. The "Do Not Disturb" mode allows you to block out sounds and lights at night, while ensuring a calm, punctual morning.

Precise Dial Master™ dial control

The central Dial Master™ dial allows precise adjustment of temperature (in 1°C increments), brightness (in 10% increments) and volume (in 1% increments). The responsive IPS screen makes operating the device fast, intuitive and fun.

One touch - many scenes

Four customizable shortcuts allow you to instantly run scenarios of your choice, such as "Leaving Home", which turns off all devices, or "Party Scene", which turns on lights and music. Hub 3 adapts the home environment to your rhythm of the day.

Control it the way you like it

Working with Siri, Alexa, Google Assistant, HomeKit, SmartThings and smartwatches, you can manage your home by voice, app or buttons on your device. Full control - always at your fingertips.

Automation and geofencing

Hub 3 recognizes your location and automatically turns on the appropriate devices when you approach your home. Schedules and scenes take care of comfort, energy savings and full integration with Apple, Google and Home Assistant ecosystems.

Included

- SwitchBot Hub 3
- USB-C power cable (1m)
- 5V/2A AC adapter
- User manual

Manufacturer	SwitchBot
Model	Hub 3
Communication standard	Wi-Fi 802.11b/g/n 2.4 GHz, Bluetooth Low Energy
Protocol	Matter
Compatibility	Apple Home, Home Assistant, Amazon Alexa, Google Home
Display	IPS Display
Features	Matter hub (up to 30 slaves), IR control (over 101,000 device codes), temperature, humidity and light sensor, motion detection, CO ₂ display (with Meter Pro CO ₂), lock status display, weather forecast display, automation and scenes, alarm with voice notifications, 4 smart buttons + Dial knob, schedules and geofencing, multi-room monitoring
IR control range	360°
Matter gateway range	50% greater, up to 200 meters in open space
Dial adjustment	Temperature ±1°C, brightness ±10%, volume ±1%
Power supply	5V□ 2A (input), 5V□ 100mA (output) - 5V/2A power adapter included
