TWS QCY MeloBuds N70 earphones (black)

Discover a world of music in the highest quality with the QCY MeloBuds N70. Thanks to dual dynamic drivers and MEMS tweeters, every note sounds natural, and support for the Hi-Res Audio certified LDAC codec ensures exceptional audio clarity. Active noise cancellation of up to -56 dB allows you to fully disconnect from the hustle and bustle and focus on your favorite music, while three AI-enabled microphones guarantee crystal clear conversations regardless of the environment. With a fully charged case, you can enjoy up to 50 hours of playback, and a dedicated app allows you to personalize the sound.

Precision in every tone

The innovative DualCore Acoustic System combines a ring-shaped dynamic driver with a precision MEMS tweeter for exceptional sound depth and space. Powerful, resilient bass harmonizes with clear treble to create a full, balanced bandwidth. A unique acoustic channel separates the paths for low and high frequencies, minimizing distortion and allowing the sound to remain natural. In addition, LDAC codec support and Hi-Res Wireless Audio certification enable studio-like sound quality - with more detail, a wider soundstage and realistic color reproduction.

Listen without distortion

QCY PureSilenz™ technology effectively reduces noise down to -56 dB, allowing you to focus only on what you want to hear. Each earphone is equipped with three advanced microphones that eliminate call noises or street noise over a wide 5 kHz range. The adaptive ANC system automatically adjusts noise cancellation levels to your surroundings - works equally well in the office or on the city subway. During calls, on the other hand, AI Call Clarity technology and patented Wind Shielding Design reduce wind gusts and interference, so your voice always sounds clear and crisp no matter where you are.

Sound tailored to you

The HearX™ feature in the QCY app allows you to create a personalized sound profile. A short test analyzes your ears' sensitivity to different frequencies and automatically adjusts the EQ curve to make each song sound exactly how you like it. From within the app, you can also select noise cancellation modes, customize touch controls, use multipoint connection or update software. For complete control, there are also special modes - Game Mode with low latency and Sleep Mode, ideal for relaxation.

Stable connection without interruptions

The earphones support Bluetooth 6.0, which provides faster pairing, lower latency and an even more stable connection regardless of conditions. With Fast Pair, a single tap is all it takes to instantly connect to your phone, tablet or laptop. What's more, the Dual Connection mode allows you to maintain a simultaneous connection to two devices - so you can switch seamlessly between talking on your laptop and playing music from your smartphone without having to pair again.

Many hours with music

The QCY MeloBuds N70s offer impressive runtime - with the charging case, you can listen to music for up to 50 hours, and one full charge of the earphones is enough for 10 hours of continuous playback. With ANC noise cancellation enabled, the operating time is up to 35 hours with the case or up to 7 hours without it, which still ensures long use without the need to reach for the cable. As an added bonus, wireless charging support makes renewing power even more convenient and faster.

Intuitive touch control

Operation of the QCY MeloBuds N70 is intuitive - a gentle touch is all it takes to pause or resume playback, switch a song or answer a call. This way you don't have to reach for your phone. In addition, a longer hold activates noise cancellation, Transparency mode or voice assistant, allowing you to fully customize the operation of the earphones to the situation.

Comfortable at any time

CloudComfy's soft, dual-layer tips, available in five sizes, guarantee a perfect fit and stability even when worn for long periods of time. Their tight fit not only increases comfort, but also enhances the impression of immersive sound and strengthens the effectiveness of noise cancellation. The IPX5-compliant sweat- and splash-resistant design makes the earphones perfect for both workouts and rainy days. In addition, Smart Wearing Detection automatically pauses music when you remove the earphones from your ears and resumes when you put them back on - so you always stay in the groove.
