Aprašymas

Freewell Filter Set for OSMO NANO "Bright Day" – 4 pcs.

The Freewell "Bright Day" filter set for DJI Osmo Nano is a practical solution for those who want to maintain great image quality even in strong sunlight. The set includes four filters: ND8/PL, ND16/PL, ND32/PL, and ND64/PL. Each filter combines the functions of a neutral density (ND) filter and a polarizing (PL) filter, which allows you to reduce the amount of incoming light and eliminate unwanted glare. As a result, videos recorded in bright environments gain contrast, color saturation, and clarity.

Fit and quality

The filters have been designed specifically for the DJI Osmo Nano camera, ensuring a perfect fit and easy installation. Each filter is lightweight, durable, and features a water, dust, and scratch-resistant coating. In addition, the anti-reflective (AR) coating reduces the risk of unwanted light reflections, and the vignette-free design ensures a uniform image across the entire frame. It's a solid choice for anyone who shoots in variable lighting conditions.

Included in the set

- ND8/PL filter
- ND16/PL filter
- ND32/PL filter
- ND64/PL filter
- Filter case
- Cleaning cloth
