82.99€

Freewell Neutral Density ND64 Filter for OSMO 360

The Freewell ND64 filter for DJI Osmo 360 is designed for shooting in extremely bright conditions. It reduces the amount of light entering the lens by up to 6 stops, resulting in smoother shots and a natural motion blur effect – even when filming in bright sunlight. This makes it easier to maintain the correct exposure settings and achieve a cinematic look.

Designed for Osmo 360

The filter fits perfectly with the DJI Osmo 360, ensuring quick and secure installation without additional accessories. Its design is lightweight and well-balanced, so it does not adversely affect the stabilizer's performance. It is a good solution for those who want to achieve professional-looking shots without the need for post-production correction.
