OpenRock Link 10 wired over-ear headphones (black)

OpenRock Link 10 are wired open-ear headphones designed for work, calls and everyday use. They offer a 1.2-meter USB-C cable and an additional 0.95-meter USB-A adapter extension cable for flexible customization. On top of that, there's a 30 mW driver and a dual AI noise-canceling microphone. All this makes the OpenRock Link 10 headphones perfect for a variety of situations - from video conferencing, remote working and online learning, to training and walking.

Open-ear design - all-day comfort

The open-ear design ensures that the headphones do not clog the ear canal. This design keeps you in touch with your surroundings, which is especially useful in the office, during online meetings or teamwork, as well as outdoors, such as when walking. The light weight and stable fit make the

headphones fit well on the ears in a variety of situations.

AI noise cancellation and clear conversations

The AI-enabled dual microphone used effectively reduces ambient noise, blocking up to 99.2% of background sounds. This ensures that your caller will hear your voice clearly and naturally - even when you're in a noisy office or on the street. Combined with a 30 mW driver, the headphones deliver clear voice calls and powerful, crisp sound.

Rotating microphone

You can swivel the headphones' microphone 240°, so you can easily place it in the optimal position relative to your mouth, and when you don't need it, simply move it away so it doesn't bother you. Such a solution increases the comfort of use and improves the quality of calls. The headphones will work well for phone calls or video conferences, as well as for online learning.

Remote control integrated into the cable

There is a small remote control on the cord of the headphones, which allows you to adjust the volume, mute the microphone, answer and reject calls, switch songs and use the voice assistant. You have all the functions at your fingertips, which significantly improves daily work and communication.

Universal compatibility and flexible cabling

With dual USB-C and USB-A interfaces, the headphones are compatible with a wide variety of devices. In addition, OpenRock Link 10 works seamlessly with popular platforms such as Zoom, 3CX, Avaya, RingCentral or Google and Microsoft solutions. Moreover, an additional extension cord allows you to adjust the length of the cable to suit your current needs and keep your desk tidy.

Included

- Headphones
- Extension cable with USB-C to USB-A adapter
- User manual
