

AURZEN Magplay mount

Modelis: AU-PJ001MP-USBK0

Gamintojas: AURZEN

EAN: 6976058150995

Prekės kodas: 560534

52.99€

AURZEN Magplay mount

The AURZEN Magplay mount combines powerful N52 magnets with a twist-lock vacuum mechanism, ensuring a secure and stable attachment to smooth surfaces. It offers 360° rotation, allowing you to easily position your device at the angle that is most comfortable for you. The design is suitable for many types of equipment, and the included magnetic ring increases its versatility in everyday use. Simple installation without tools allows you to quickly set up a stable work or entertainment station in almost any space.

Stable installation in any space

The AURZEN Magplay mount uses an N52 magnet to provide stable support for compatible devices. The use of a dual mounting system (magnetic and vacuum) allows you to use the mount in a variety of scenarios without the need for additional tools. The twist-lock mechanism with a maximum suction force of approximately 11.3 kg guarantees a secure fit on smooth, flat surfaces. This allows you to safely mount your device wherever you need it – at home, in the office, or on the go.

Full control over the angle of adjustment

The design of the mount allows for 360° rotation, allowing you to precisely adjust the position of the device to your current needs. The free adjustment works well for both horizontal and vertical positioning without compromising stability. The rotating mechanism maintains the selected angle without loosening during use. This allows you to position the screen exactly where it provides the best visibility and ergonomics.

Compatibility with multiple devices

Magplay is designed to be compatible with many types of devices, which increases its functionality in everyday use. The set includes a magnetic ring that extends compatibility to equipment not factory-equipped with a magnetic element. This allows you to adapt the mount to different configurations without having to replace accessories. One solution allows you to organize your space and eliminate the need for several different mounts.

Maximum adhesion on smooth surfaces

The holder is designed for direct mounting on smooth, flat surfaces, which ensures optimal performance of the vacuum system. Proper preparation of the surface – cleaning the surface and removing the protective film from the suction cup – increases the effectiveness of the attachment. After pressing the holder onto the selected location, simply turn the silver handle to the left to activate the lock. This method of installation allows you to quickly and safely prepare your workstation without the use of tools.

Included in the set

- Magplay holder
- magnetic ring
- user manual
