Utimea Apollo P60 Projector

The Utimea Apollo P60 is an advanced projector designed for high-quality home entertainment. It uses innovative optical technology based on a multi-layer lens and a high-transmission mirror. This combination translates into an extremely detailed and vivid image that impresses with its clarity and depth. A brightness of 900 ANSI lumens and 90% brightness uniformity ensure a consistent visual effect even at the edges of the image, without any loss of detail.

More detail in every scene

Utimea Apollo P60 supports 4K image decoding and the HDR10 standard, which allows for a more refined, cleaner, and detailed image. Each scene gains better contrast, greater depth, and clearer tonal transitions, giving movies, TV series, and video broadcasts a cinematic feel. The projector allows you to display images on a large screen and supports AirPlay and Miracast technologies. This allows you to easily stream content directly from your smartphone, tablet, or laptop without the need for additional cables.

Intuitive system and thoughtful design

The proprietary Utimea OS system has been designed with simplicity and functionality in mind. The clear, user-friendly menu and extensive settings allow you to easily adjust the image and sound parameters to suit the mood and conditions in the room. The projector also offers low input lag, which translates into smooth, stutter-free image display in your home theater. What's more, the projector's 99% dust protection design eliminates the problem of black spots on the image and significantly extends the life of the device – up to more than 10 years of use.

Perfect image in seconds

The Utimea Apollo P60 is equipped with advanced automatic algorithms that ensure perfect image adjustment. Intelligent obstacle avoidance, automatic screen adjustment, 3-second autofocus, and automatic 6D keystone correction allow the projector to adapt to the conditions in the room, saving you time and ensuring perfect results without manual configuration.

Cinema sound with powerful bass

The Utimea Apollo P60 is equipped with 30W speakers that use an independent diaphragm design and DSP technology. The result is deep, clear bass and spacious sound that lets you experience the full cinema experience without the need for additional speakers. In addition, Bluetooth 5.3 allows wireless connection to the Utimea soundbar (available separately) to further enhance the audio experience.

Included

- projector
- remote
- AV cable
- HD cable
- power cable
- user manual

Manufacturer	Utimea
Model	Apollo P60
Connection Wi-Fi	2.4 GHz/5 GHz
Native resolution	1920*1080P
Speaker drivers	15 W*2
Throw ratio	1.37:1
Aspect ratio	16:9 / 4:3
Recommended screen size	80"-120"
Power consumption	95 W
Input voltage	100–240 V AC, 50–60 Hz, 3.5 A
Supported technologies	DSP, 4K, USP AA, Airplay, Miracast, HDR10
Operating system	Utimea OS
Brightness	900 ANSIlumens
Security	Dust protection
Lifespan	Over 10 years
Speakers	30W
Chipset	MediaTek
Bluetooth	Version 5.3
