Aprašymas

Zeblaze Eyewear AI Glasses – Black

Zeblaze Eyewear are groundbreaking AI glasses that combine advanced technology with everyday comfort, offering the support of a smart assistant powered by the ChatGPT-4o mini processor. The device is equipped with a high-quality 5 MP camera that allows you to capture photos and videos in 1080p resolution. Add to that up to 14 hours of battery life on a single charge, allowing you to freely use AI features, play music, or make voice calls. Ask the AI questions, receive personalized advice, boost your productivity, learn more about the places you visit while traveling, and capture fleeting moments—with Zeblaze Eyewear, almost anything is possible!

A smart assistant always by your side

At the heart of the glasses is a personalized AI assistant that learns your habits and preferences and remembers past conversations, making it a better support every day. You can activate it with a simple voice command, “Hey Cyan,” or a dedicated button to get instant answers to questions, lifestyle advice, or help with work tasks. The system offers natural, human-like interaction and also allows you to translate text in real time, identify plants, and set reminders, among other things.

Capture important moments in high quality

The integrated 5 MP camera with an advanced lens system lets you capture your most important moments exactly as you see them, without having to take out your phone. Take detailed photos and record 1080p videos (up to 60 seconds each)—Zeblaze Eyewear delivers great quality even in low

light. You also don’t have to worry about unwanted shakes ruining your shots. Thanks to Anti-Shake technology, every recording is stable and clear. What’s more, to protect your privacy and that of those around you, the glasses feature a light indicator that signals when the camera is recording.

Immersive sound and full awareness of your surroundings

Zeblaze Eyewear offers a unique audio experience thanks to two open-ear Hi-Fi speakers with a superlinear system, delivering rich, spatial sound. This design allows you to enjoy your favorite music or make phone calls while remaining fully aware of ambient sounds, ensuring that the audio is audible only to you. The system is supported by automatic gain control and an integrated microphone with active noise cancellation (ANC) and acoustic echo cancellation, ensuring crystal-clear call quality. You don’t need additional headphones—the glasses alone are enough!

Intuitive controls and a dedicated app

Managing the glasses’ features is incredibly simple thanks to the touch panel and easily accessible buttons on the frames. This allows you to conveniently take photos, control music, use the smart assistant, answer calls, and much more. The full potential of the device is unlocked by the HeyCyan app, which serves as a multimedia management hub and a connection point to the AI model. From your smartphone, you can, for example, view chat history, check transcriptions of audio recordings, manage to-do lists, view photos and videos, edit videos with AI, change settings, and export data.

Data Security and Privacy

Your privacy is a priority, which is why all queries, photos, and suggestions are anonymized before being sent to AI services. Data is protected using intelligent TLS and AES encryption and secure transmission, giving you full control over what is stored, deleted, or exported. This allows you to use modern technologies with complete confidence, knowing that your personal information remains secure.

Long-lasting battery and magnetic charging

The glasses are designed for heavy use, offering up to 14 hours of battery life, allowing for extended conversations with AI, taking photos, or playing audio. The device charges via a magnetic cable, allowing you to quickly and conveniently restore the device to full working order. It takes about 1.5 hours to fully recharge!

Included

- AI Glasses x1
- User manual x1
- Magnetic charging cable x1
- Nose pad x1
- Glasses cleaning cloth x1
- Glasses case x1

Manufacturer	Zeblaze
Product name	AI Shooting Glasses
Model	Eyewear
Frame color	Black
Lens types	Photochromic lenses
Weight	48.5 g with lenses / 39 g without lenses
Frame material	Plastic
Number of buttons	2
