Roborock Q10 PF+ Cleaning Robot (black)

Let yourself out of unpleasant chores. Roborock Q10 PF+ cleaning robot will help you take care of the tidiness of your apartment - it will vacuum and clean the floors thoroughly. It offers a suction power of up to 10,000 Pa, so it effectively removes dirt, and it can automatically lift the mopping module, preventing carpets from getting wet. In addition, it efficiently avoids obstacles and quickly maps the room, while managing its work is made easy with the Roborock app. You'll also find the RockDock Plus station, which empties the robot's dust tank.

Fast and thorough vacuuming

With a suction power of up to 10,000 Pa, the robot eliminates even stubborn dirt in no time. Dust, breakfast crumbs, dog hair on the carpet or dirt hidden in the crevices in the floor - no challenge will frighten it. It will be perfect for the homes of parents of small children or pet owners!

Forget about hair entangled in the brush

The robot's main brush is distinguished by a combination of rubber parts and bristles, a V-shaped design and a small JawScrapers comb. The device also has an asymmetrical side brush with extended bristles and a soft baffle made of rubber. All this effectively prevents hair tangling - forget the hassle of tedious cleaning!

Auto Lifting Mopping System

The robot will also take the hassle out of mopping your floors. It effortlessly eliminates even stubborn stains and offers three levels of water flow to choose from. You can easily adjust its performance to your needs! It is also distinguished by the Auto Lifting Mopping System solution, which allows you to automatically lift the mopping module to a height of about 8 mm - for example, when it detects a carpet or when you finish cleaning dirty areas. This will help you avoid getting your carpets wet! You also don't have to worry about dirt finding its way back onto the just-cleaned floor.

Automatic emptying of the dust container

The kit includes a special RockDock Plus station that allows you to automatically empty the robot's dust tank. The dust bag designed for it effectively filters various types of allergens, such as dust mites and pollen - a great option for allergy sufferers. You don't need to replace it too often - you only need to do it once every seven weeks or so!

Effortlessly bypasses obstacles

Cluttered rooms? Toys scattered on the floor? No problem - the Q10 PF+ robot will easily avoid them. Thanks to structured lighting technology and an infrared camera, the device effectively detects obstacles, such as slippers or pillows, for example. Don't worry about hitting something!

Advanced navigation system

The robot uses the LDS navigation system to quickly map rooms and plan the most efficient cleaning routes. It can memorize up to three maps, making it ideal even for storied homes. What's more, the Q10 PF+ automatically detects areas that may generate problems, such as the space between chair

legs or around stairs, and then suggests creating No-Go zones in these areas. As a result, it will not have access to them, thus avoiding it from falling or getting blocked!

Roborock app - even more possibilities

Install the Roborock app and gain convenient access to many useful features of the robot. Using it, you can, among other things, enable DEEP+ intensive mopping mode or automatic power boost on carpets. It is also possible to direct the device to clean the selected area again - just a few clicks. Also take advantage of the cleaning function along the joints of the floor - this way you will avoid scratching the floor.

Included

- Robot
- Mopping module
- Emptying station
- Power cord
- Mopping pad
- Quick start guide
- Moisture-resistant mat
- User manual

Name	Roborock Q10 PF+
