

Vacuum Cleaner Roborock Qrevo Edge T (white)

Modelis: QRET02-00

Gamintojas: ROBOROCK

EAN: 6936905903242

Prekės kodas: 560588

776.99€

Vacuum Cleaner Roborock Qrevo EdgeT (white)

A perfectly clean home without effort? Now it's possible. Roborock Qrevo EdgeT is a cleaning robot designed for maximum precision and automation. Thanks to its ultra-thin body (7.98 cm), the device gets into hard-to-reach places - under sofas, beds and cabinets. The suction force of 18,500 Pa ensures effective elimination of a variety of dirt, and the Dual Anti-Tangle system eliminates the problem of hair getting caught in the mechanism. The Multifunctional Dock 3.0 automatically empties the dust container, and also washes and dries the mop pads. A reliable navigation system and the use of a camera and artificial intelligence allow it to accurately avoid obstacles and recognize animals. Operation is facilitated by an app and voice control capability - even offline.

High suction power and effective mopping

The HyperForce system allows the robot to achieve a suction force of 18,500 Pa, so dirt from hard floors, crevices, carpets and rugs is effectively eliminated. In addition, the 2 rotating mopping pads,

which move at 200 RPM, exert up to 8 N of pressure, ensuring a spotless clean. When necessary, the device automatically lifts them to a height of 10 mm, such as when driving over carpets, protecting the fibers from getting wet.

100% coverage at the edges

The special design of the side brush and right mopping pad allows them to automatically extend near walls and into corners. This allows the robot to clean thoroughly without skipping any part of the surface and leaves no streaks or dust at the trim. The Clean Along Floor Direction function allows the device to adjust the direction of travel according to the layout of the panels or boards. As a result, it better reaches the crevices and does not damage the surface, providing better results on wood floors.

Intelligent cleaning strategy

The device recognizes the type of floor and category of the room, and then automatically selects a cleaning strategy. With the Vacuum Carpet First function, Roborock Qrevo EdgeT automatically vacuums detected carpets before mopping other areas. This avoids contact between wet mopping pads and fibers. In Deep Carpet Cleaning mode, the robot makes 2 passes in a cross pattern, automatically increasing the suction power - this sequence of work ensures more thorough elimination of dirt from deeper layers of the pile.

Dual Anti-Tangle System

The use of DuoDivide main brush and FlexiArm Arc side brush effectively eliminates the problem of hair and dander getting caught in the robot mechanism. Roborock Qrevo EdgeT collects and sucks up dirt, maintaining full efficiency without the need for frequent manual cleaning. This makes it also great for homes with pets.

Intelligent navigation and obstacle avoidance

The Roborock Qrevo EdgeT cleaning robot automatically adjusts the position of the LiDAR sensor - in an open space, it operates with a full 360° panorama, and lowers itself to maintain mapping accuracy with low furniture. As a result, it moves smoothly and seamlessly through any part of the

house, avoiding localization errors. Using Reactive AI, structured light and an RGB camera, the device can recognize as many as 108 types of objects in 26 categories, including shoes, cables, bowls or toys - even in less favorable lighting conditions.

Automated operation

The Roborock Qrevo EdgeT docking station is responsible for all key maintenance steps of the device. After cleaning, it empties the dust container, fills the water tank and washes the mopping pads with up to 75°C water, removing grease, dirt and up to 99.99% of bacteria. It then dries them with warm air (45°C), which prevents mold growth and odors. The station continuously monitors the level of dirt and, if necessary, initiates an additional cycle of mopping elements or re-mopping the floor. A built-in self-cleaning system directs dirt to a central filter, reducing the need for manual cleaning. The base of the station is detachable for easy cleaning. The whole thing is complemented by a fast-charging function and Off-Peak Charging mode, which allows energy to be renewed during hours when it's cheaper.

App, voice control and personalization

You won't find it difficult to operate the robot. The built-in voice assistant responds to the "Hello Rocky" command, allowing you to start cleaning, change the suction power, mop intensity or have it clean a specific room - and all without a Wi-Fi connection. From the Roborock app, you can create maps of your apartment, manage cleaning zones, set schedules and modes, and adjust every parameter - from suction power to water consumption level. A real-time preview of cleaning progress is also available.

Features for pet owners

Roborock Qrevo EdgeT ensures the safety of pets and allows remote interaction with them. The robot recognizes the presence of a cat or dog in its environment - if it detects a pet, it automatically stops the main brush and slows down, then avoids it from a safe distance. With it, you can also remotely locate pets, make real-time video calls and have your pet take photos.

- Cleaning robot
- Multifunctional docking station
- Station base
- Power cord
- Mopping module
- User manual

Name	Roborock Qrevo EdgeT
Battery capacity	5200 mAh
Suction power	18,500 Pa
Power	60W
Previous model name	Vivian SC
Docking station dust container capacity	2,7 l
Dirty water tank capacity in docking station	3,5 l
Capacity of clean water tank in docking station	4 l
Capacity of the dust tank in the robot	259 ml
Water tank capacity in the robot	68 ml
Uptime	Up to 180 min
Mopping function	Yes (mopping pads)
Self-cleaning function	Yes
Navigation system	LIDAR
Charging time	4h
Number of water flow levels	4
