Aprašymas

Colmi V06 AI Sports Sunglasses (Black with Blue Lenses)

The Colmi V06 AI are modern sports sunglasses with a built-in camera and 2K recording capability, allowing you to capture every activity from a first-person perspective. Thanks to AI integration (such as ChatGPT, DeepSeek), object recognition, and Bluetooth and Wi-Fi connectivity, they are perfect for workouts, bike rides, mountain trips, and more. Add to that an IP54 rating, 360° surround sound, and a 260 mAh battery that provides up to about 5 hours of use.

Record what you see – 8 MP camera and 2K quality

The built-in 8 MP camera allows you to record video in 1200p quality. This is incredibly convenient while cycling, running, or trekking—you capture everything exactly as you see it. In addition, the image stabilization (anti-shake) feature reduces shaking, ensuring that even dynamic shots are smooth and clear. The glasses also offer the ability to sync storage, making it easier to manage your recordings.

AI that supports you every day

The glasses use artificial intelligence to recognize objects and analyze images. A simple voice command is all it takes for the device to automatically capture, identify, and describe what’s in front of you! What’s more, integration with language models such as ChatGPT or DeepSeek allows you to use voice assistant features and interact in real time. So you can quickly get answers to your questions, ask for directions to the nearest store, and more. The AI Image Enhancement feature is also available, which automatically improves image quality by brightening scenes in low light, reducing noise, applying a background blur effect, and enabling HDR.

360° Sound and Bluetooth Calls

The built-in speakers offer 360° surround sound, allowing you to listen to music and AI prompts without being cut off from your surroundings. The glasses deliver excellent sound quality, so your favorite tracks will sound truly great! You also have access to a Bluetooth calling feature, which lets you answer calls without reaching for your phone, enhancing safety and convenience while driving.

Fast data transfer – Bluetooth and Wi-Fi

Dual transmission mode (Bluetooth 5.3 + Wi-Fi) allows for fast and stable transfer of photos and videos from the glasses directly to your smartphone. This lets you instantly save and share content—without worrying about storage space on your device.

IP54 rating – ready for any weather

The glasses are dust- and splash-resistant in accordance with the IP54 standard. This means they’ll handle intense workouts or riding in the rain with ease. Additionally, water droplets quickly roll off the lenses without leaving streaks, so you don’t have to worry about visibility issues in rainy weather.

Comfortable to wear even for hours on end

The V06 model is designed to eliminate pressure on the nose and behind the ears. Additionally, a 3-point stabilization system and non-slip elements improve the fit and prevent the glasses from slipping during movement. Add to that a curved design that reduces air resistance, which you’ll especially appreciate while cycling. The device also features a removable inner frame that allows for the installation of prescription lenses. This is a practical solution for people with vision impairments who want to take full advantage of the glasses’ functionality.

High-capacity battery

The glasses are equipped with a 260 mAh battery, which provides approximately 5 hours of runtime (during audio playback). That’s plenty of time to use them freely during workouts, cycling, or other activities. Additionally, magnetic charging is used, allowing for quick and convenient recharging.

Manufacturer	Colmi
Model	V06
Color	Black + blue lenses
Camera	8 MP
Video resolution	1200p (2K)
Battery capacity	260 mAh
Battery life	Approx. 5 hours (during audio playback)
Connectivity	Bluetooth 5.3 + Wi-Fi
Water resistance rating	IP54
Lens material	PC
