EMEET SmartCam Nova 4K Webcam

The EMEET SmartCam Nova 4K is designed for people who expect more than standard quality during calls and recordings. The camera offers Ultra HD 4K resolution, fast and precise autofocus, and effective noise reduction in the microphones, ensuring you look professional in any situation. Intuitive plug-and-play operation, extensive customization options, and a well-thought-out design ensure ease of use in everyday life. This is a device that will prove useful for work, study, and content creation alike.

An image that brings out every detail

The SmartCam Nova offers Ultra HD 4K resolution—four times more detail than standard Full HD—which translates to a clear and detailed image during meetings, training sessions, or recordings. By default, the camera operates at 1080p resolution, ensuring broad compatibility, but you can easily switch it to 4K mode using dedicated software or apps such as OBS or PotPlayer. Focus is

handled by the PDAF autofocus system, which instantly adjusts the image to movement within the frame, ensuring it remains clear even when changing positions or presenting objects.

Smart Lighting and Image Customization

The camera supports Backlight Compensation (BLC), which can be activated in the EMEETLINK OS, allowing you to maintain a bright and clear image even in challenging lighting conditions, such as when working against the light. Additionally, the EMEETLINK software allows for precise adjustment of parameters such as brightness, contrast, and color balance, so you can tailor the image to your preferences and the surrounding environment.

Clear, interference-free sound

Two built-in noise-canceling microphones effectively capture your voice while eliminating unwanted ambient noise. This ensures that callers hear you clearly and naturally, even in less-than-ideal acoustic conditions.

A design that adapts to you

The 73-degree field of view is designed to focus on the person in front of the camera while eliminating unnecessary background elements. This ensures you look professional, and the viewer's attention remains focused on you. The thoughtful design makes the camera comfortable to use. The 180-degree tilting stand, 360-degree rotating head, and 15-degree tilt allow you to set the perfect framing angle in any situation. Whether you're working at a desk, recording from a different angle, or frequently adjusting your setup, the SmartCam Nova adapts to your needs.

Details that make a difference

The camera features plug-and-play setup, meaning it requires no complicated installation or additional drivers. Simply connect it to your computer to start working immediately. Additionally, the set includes a lens cover that allows you to easily protect the lens when the camera is not in use. This is a device that combines modern technology with practical solutions, creating a reliable tool for work, study, and entertainment.
