Anycubic Heated Resin Tank for Photon Mono M7 Max

The Anycubic Heated Resin Tank for Photon Mono M7 Max maintains a constant material temperature thanks to Smart Heating Resin technology, which improves resin flow and results in more accurate detail reproduction and fewer failed prints. The design, tailored to this specific printer model, facilitates installation and daily use, while the use of ACF film improves layer release and increases the component's durability. This makes the entire printing process more stable and predictable, even for more demanding projects.

Manufacturer	Ancubic
Compatibility	Photon Mono M7 Max
Weight	1709 g
Dimensions	435 × 313 × 83 mm
Heating function	Smart Heating Resin
Film type	ACF Film
Resin tank lid	No

Gross weight: 1710, Net weight: 1707, Box length: 44,00, Box width: 32,00, Box height: 9,00
