SwitchBot Smart Floor Lamp

SwitchBot Floor Lamp is a modern standing lamp that transforms any room into a smart space full of possibilities. With Matter certification, this model provides full compatibility with Apple Home, Alexa, Google Home and many other smart home platforms, allowing for seamless integration without the need for additional control panels. SwitchBot offers local control that works even when there is no internet connection, guaranteeing quick response and better privacy. The lamp's height is 135 cm and the diameter of the base is 20 cm, making it ideal for bedrooms, living rooms, offices or desk or bookshelf spaces, and its minimalist design with a sleek aluminum body blends perfectly with modern interior design.

A spectrum of colors at your fingertips

The SwitchBot standing lamp revolutionizes the way you use home lighting, offering advanced RGB+CCT technology in a 3-in-1 format. The lamp provides access to the full RGB color palette with temperatures from 2700K to 6500K, allowing you to choose from more than 16 million colors and

create the perfect mood for any occasion. With a brightness level of up to 1,200 lumens and an adjustable range of more than 100%, the SwitchBot Floor Lamp is perfect for reading, working, sleeping, or creating a festive atmosphere. A wealth of color options allows you to personalize the lighting always according to the mood you want to create.

Customized control

The SwitchBot lamp offers an extremely versatile control system, tailored to your lifestyle and preferences. You can manage the lighting with your voice via Alexa, Google Assist or Siri Shortcuts, allowing you to conveniently turn on, off or change colors without touching your phone. The dedicated app allows you to fully personalize settings, create custom light scenes and schedules, and even remotely control from anywhere in the world. You'll also find an infrared remote control with 24 keys and a wired controller that provide alternative methods of operation without the need for the internet or a smartphone. The control system works over both Wi-Fi and Bluetooth, guaranteeing a stable connection and immediate response to your commands, and the ability to create automation makes the lighting adapt to your lifestyle, even supporting scenarios to help your kids fall asleep.

Technology without compromise

The SwitchBot Floor Lamp model is designed with superior build quality and functionality in mind. The premium silicone light shield provides natural, long-lasting translucence and guarantees smooth, continuous illumination with no visible gaps or bands of light, setting this product apart from the competition. The heavy-duty aluminum body not only looks sleek, but also effectively dissipates heat, ensuring long-term operation without overheating. Wide-angle lighting technology with a 100-degree angle allows the light to be evenly distributed in the room, eliminating the point-source effect and creating a pleasant, soft glow. With its compact size and ability to be positioned both vertically and horizontally, the SwitchBot Lamp fits perfectly into any corner: under a sofa, next to a bed, desk or bookshelf, offering maximum design flexibility without taking up valuable space.

Smart home ecosystem

The SwitchBot Floor Lamp gains even more possibilities when you integrate it with other devices from the SwitchBot ecosystem. The ability to sync with the Motion Sensor allows you to

automatically illuminate a room up to 30% brightness at night when motion is detected, ensuring safe movement in the dark without glare. Combining it with Contact Sensor allows you to create smart welcome scenarios that automatically turn on the lights when you open the door when you come home, creating a warm atmosphere and saving energy by automatically turning off after you leave. By adding Strip Light 3 LED strips or Spotlight Cams, you can create an immersive ambient lighting system that enhances the visual experience when watching movies or playing games, taking the entertainment experience to the next level. Integration with Hub 3 or Lock Ultra allows for even more advanced automation, including the ability to control all lights and appliances with a single touch, making your home truly smart.
