Aprašymas

COLMI M02S AI Photochromic Sunglasses

The COLMI M02S AI Glasses are a modern combination of several devices in one—they offer the functions of an AI voice assistant, an HD camera, Bluetooth headphones, and a voice recorder. With support for language models, real-time translation, and intelligent image recognition, they are ideal for everyday use, work, and travel. Their lightweight design, convenient touch controls, and hands-free operation make using them quick and natural. The COLMI M02S supports language models such as ChatGPT and Doubao, providing fast access to information in any situation and allowing you to ask questions without interrupting your current activities.

HD Camera and POV Recording

The built-in 8 MP camera allows you to take photos and record videos in HD quality hands-free. POV mode lets you capture footage exactly from the user’s point of view, which is ideal for travel, work, or creating video content. Photos and videos can be launched with simple gestures on the frame,

which speeds up response time and lets you capture important moments without delay. The ability to record audio directly from the device makes the glasses ideal for meetings, online calls, or creating voice memos, without having to reach for your phone.

Sound and Listening Comfort

The "Pure Pitch Accuracy" technology optimizes sound at the chip level, resulting in a more natural sound. Real-time tone compensation ensures that bass is clear and treble is crisp. Open speakers in the temples ensure listening comfort without completely cutting you off from your surroundings, which enhances safety and convenience. Additionally, directional sound limits its audibility to bystanders, improving privacy during calls and while listening to music.

Connectivity and hands-free calls

Thanks to Bluetooth 5.4, the glasses provide a stable connection to your phone and fast data transfer. The hands-free calling feature allows you to make calls without using your hands, which is useful at work, while walking, or while driving. Answering and ending calls is done with a single touch, simplifying operation and reducing response time. Stable connectivity also ensures smooth operation of AI features and synchronization with the mobile app.

Lightweight and durable design

The M02S model weighs just 41 g, making it comfortable even during extended wear. The frames are made of TR90 material, which combines flexibility with high resistance to mechanical damage. The IP65 rating protects the device from dust, sweat, and rain, making the glasses suitable even for more demanding conditions. An additional advantage is the ability to fit prescription lenses, allowing them to be tailored to the user’s individual needs.

Touch and physical controls

The controls are designed to minimize the need to reach for your phone. A touch panel on the right temple and two physical buttons allow you to react quickly in any situation. Simple gestures allow you to control music, calls, the camera, and AI features—a single tap performs basic actions, while a double tap lets you, for example, start recording or activate image recognition. Swiping with your finger adjusts the volume, and holding down longer lets you skip tracks or activate additional features.

App and Feature Management

The dedicated mobile app serves as a control center, offering access to device status, battery level, and features such as recording, photos, and AI Chat. The glasses work with the Hey Cyan (ChatGPT) app, allowing for convenient use of AI features directly from your phone. Users can manage their album, view recordings, and adjust device settings. Integration with the app simplifies daily use and allows you to make better use of the glasses’ capabilities.

Battery and runtime

The 290 mAh battery provides up to 7 hours of music playback or up to 4 hours of talk time. A full charge takes about 2 hours, allowing you to quickly prepare the device for further use. Thanks to this, the glasses are suitable for both short outings and longer sessions, offering stable and reliable performance throughout the day.

Included

- COLMI M02S Smart Glasses
- Magnetic charging cable
- User manual
- Drawstring pouch
- Cleaning cloth
