Aprašymas

AOCHUAN XE Standard Gimbal (Black)

Meet the AOUCHUAN XE (black)—one of AOUCHUAN's best-selling gimbals, which owes its popularity to its excellent value for money. It offers professional 3-axis stabilization, intelligent face tracking, gesture control, precise zoom and focus control, and as many as 4 recording modes. Lightweight, compact, and extremely functional—it's the perfect tool for anyone who wants to create smooth and attractive video content without unnecessary complications.

Record smoothly, like a pro

The advanced 3-axis stabilization system effectively eliminates shakes and vibrations, ensuring smooth, aesthetically pleasing shots. Whether you're recording on the move, while walking, or during dynamic action—your videos will look professional and pleasing to the eye.

Discover 4 recording modes

The gimbal offers 4 operating modes (F, POV, DM, GO) that adapt the stabilization to your recording style. This lets you easily transition from calm shots to dynamic scenes—without complicated settings. It's full control over the final result.

Professional image control - zoom and focus at your fingertips

Built-in zoom and focus controls let you achieve more advanced, cinematic effects. Without the need for additional accessories, you have full control over how your footage looks—quickly, intuitively, and precisely.

Precision and range of motion that give you freedom

The gimbal offers impressive angular accuracy of 0.01°, which translates to exceptionally smooth movements. The operating ranges (pan 275°, tilt 83°, roll 318°) allow for creative framing and freedom in capturing shots—exactly as you want them.

Lightweight, compact, and always ready to go

The AOCHUAN XE weighs just about 350 g and has compact dimensions, so you can easily fit it in a bag or backpack. When folded, it takes up minimal space, making it the perfect companion for travel and everyday recording.

Long, uninterrupted operation - a battery you can rely on

The built-in 2600 mAh battery provides up to 8–10 hours of standby time, allowing you to record all day without worrying about power. Charging takes about 3.5 hours, and the device operates in a wide temperature range (0°C–55°C), making it suitable for various conditions.

Versatility and ease of use

The gimbal supports smartphones with a width of 55–90 mm and a weight of up to 250 g, making it compatible with most available models. Intuitive operation, a sturdy build, and a great price-to-performance ratio make it the perfect choice for both beginners and more advanced users.

- AOCHUAN Smart XE Gimbal
- Tripod
- USB-C charging cable
