Aprašymas

Hohem iSteady MT3 Pro Kit – a gimbal with AI tracking and remote preview

The Hohem iSteady MT3 Pro Kit is an advanced gimbal for those who shoot dynamic footage and want greater control over it. It combines image stabilization with AI features and remote control with live view, making it easier to work both solo and on more demanding projects. Thanks to its high load capacity and wide compatibility, it works well with various cameras and additional accessories.

iSteady 10.0 stabilization – smooth shots even with heavier equipment

The iSteady 10.0 stabilization system features increased motor power, resulting in more stable footage even under heavier loads. In practice, this means you can work with cameras, bright lenses, and accessories without sacrificing smooth motion. As a result, footage is more predictable and requires fewer corrections.

AI Tracking – automatic tracking of various subjects

The built-in AI camera recognizes and tracks not only people, but also animals, vehicles, and other objects. The system keeps the selected subject in the frame, making it easier to record without an operator. The feature works in real time, ensuring more consistent footage and eliminating the need for constant gimbal adjustments.

Detachable remote control with live view – greater control during recording

The kit includes a touchscreen remote that allows for remote control of the gimbal and live image preview. A range of up to 7 meters lets you comfortably control shots from a distance. The remote can be held in your hand or mounted on a mount, giving you greater freedom to work at various shooting angles.

Ready for use with various setups

With a load capacity of up to 2.5 kg, it supports most popular cameras and lenses. The gimbal also supports additional accessories, such as microphones or lights, providing greater flexibility during recording. The quick vertical/horizontal switch system makes it easy to adapt footage for different platforms.

Expanded capabilities – Pro Kit

The Pro Kit version includes additional accessories that expand the gimbal’s functionality. The follow focus motor enables precise focus control, and the two-way handle allows for more comfortable shooting from various perspectives, such as low to the ground. This translates to greater control over the shot and more creative work.

Long battery life

The 4350 mAh battery allows for up to 20 hours of operation. This means you can shoot all day without frequent recharging, which is especially important for longer shoots.

Included

- Hohem iSteady MT3 Pro gimbal
- Arca quick release plate
- Bi-Directional Twist Handle
- Touchscreen remote control
- Remote control mount
- Follow focus motor (Spot Mini Motor)
- Lens gear ring
- Motor mount
- Motor cable
- Phone mount
- Action camera adapter
- Tripod
- Mounting screws ×2
- USB-A to USB-C cable
- USB-C control cable
- Sony Multi cable
- Lens support
- Mounting knob
- Allen wrench
- Carrying case
- Documentation

Manufacturer	Hohem
Model	iSteady MT3 Pro
Type	3-axis gimbal with AI tracking
Maximum payload	2.5 kg
