Aprašymas

Zeblaze AI Eyewear

Zeblaze AI Eyewear are modern glasses with clear lenses equipped with a 1080p camera, an AI assistant based on ChatGPT-4o mini, and an open audio system that lets you listen to music while staying aware of your surroundings. Thanks to their lightweight design (39 g without lenses, 48.5 g with lenses) and built-in 32 GB of storage, you can capture photos and videos without needing to use your phone. The glasses offer intuitive touch and button controls, and their features include recording, calls, real-time translation, and "Hey Cyan" voice control. Additionally, the IPX4 rating protects them from splashes, making them more practical for everyday use.

Intuitive controls and quick access to features

The glasses are equipped with two physical buttons and a touch panel, allowing for convenient operation without reaching for a smartphone. The Capture button lets you take a photo with a single click or start recording video with a double-press. The second AI button lets you quickly ask the assistant a question or take a photo while simultaneously getting an analysis of the subject. The touch panel controls music, including pause, track selection, and playback volume, and also allows you to answer and end calls.

1080P camera with stabilization technology

The integrated 5 MP camera allows you to capture both photos and videos in Full HD 1080P quality, with a maximum recording length of 60 seconds per clip. Thanks to Super Anti-Shake technology, the image remains stable even while moving, and the low-light mode allows you to capture clear

footage in various conditions. An additional safety feature is an LED indicator that signals when the camera is active, so people around you know that recording is in progress.

“Hey Cyan” AI Assistant – Help in Every Situation

The glasses are powered by an AI processor supported by ChatGPT-4o mini, enabling natural and fast communication with the assistant. Simply say “Hey Cyan” to ask a question, get a translation, identify a plant, set a reminder, or start recording. The system learns from the user, remembers their preferences, and tailors responses to their needs, making the device experience increasingly personalized.

Open-ear audio and comfortable calls

Zeblaze AI Glasses feature an open-ear audio system that allows you to listen to music privately without isolating yourself from your surroundings. Dual speakers deliver immersive Hi-Fi sound, while technologies such as sound leakage reduction, automatic volume control, ANC, and echo cancellation ensure crystal-clear audio. The built-in noise-canceling microphone allows for comfortable phone calls even in noisy environments.

Smart audio and multimedia features

Music control is fully integrated into the touch panel, allowing for easy playback control without using your phone. A double-tap plays or pauses music, a triple-tap skips back a track, and a long press skips to the next track. The glasses also support voice calls—a single tap answers a call, and a long press ends it.

Privacy and full control in the app

Every photo, recording, and AI query is processed without personal data before being sent to AI systems, which enhances user privacy protection. Data is secured with TLS and AES encryption, and full control over the information remains in the user’s hands. The HeyCyan mobile app serves as the hub for managing all features—it allows you to sync photos and videos, edit them using AI, and access call history and transcripts. Within the app, you can view audio recordings, create notes and to-do lists, and manage account settings, privacy, and function shortcuts, which significantly simplifies the daily use of the glasses.

Included

- glasses
- magnetic charging cable
- nose pad
- glasses cleaning cloth
- glasses case
- user manual

General

Manufacturer	Zeblaze
Model	Eyewear-Clear

Design

Frame color	Black
Lens color	Transparent
Weight (without strap)	48.5 g with lenses, 39 g without lenses
Frame material	Plastic

Buttons	2
Protection rating	IPX4 (splash-resistant)

Technology

Processor	JIELI 7018F (main) + Allwinner V821 (auxiliary)
Storage	32 GB (over 500 photos, over 100 30-second videos)
