98.99€

Neewer LT07 aluminum travel tripod with ball head

Its compact design and sturdy construction make the Neewer LT07 ideal for photography and video recording while traveling, outdoors, or in the studio. The tripod is constructed from aluminum alloy, keeping it lightweight while offering a high load capacity of up to 10 kg, easily supporting DSLRs, mirrorless cameras, camcorders, and smartphones. When folded, the tripod measures approximately 5.7 cm in diameter and 52 cm in length, making it easy to transport and carry comfortably with one hand. The four-section legs allow for height adjustment from 48.5 to 156.5 cm, while three leg angle settings enable stable positioning in various shooting conditions.

Arca-compatible quick-release system

The LT07 model is equipped with a dual-compatible Arca-type quick-release plate that also works with the Peak Design Capture Clip V3 system and other Arca plates. This solution allows you to quickly switch the camera between a tripod, backpack clip, and other accessories while working in the field. The universal 1/4" thread ensures compatibility with DSLRs, mirrorless cameras, camcorders, smartphones, binoculars, or photography sliders.

Precision ball head for photos and videos

The low-profile ball head is designed for enhanced stability and smoother panning. The 40 mm panoramic base with a scale enables precise camera movements, while the U-shaped cutout allows for seamless switching to vertical shots at a 90° angle. The head can be detached and mounted on other tripods, monopods, or sliders using the 3/8" thread. An additional 1/4" thread on the quick-release clamp allows you to expand your rig with extra accessories.

Greater convenience for smartphone recording

The kit includes a 2-in-1 mount that serves as both a phone holder and a comfortable handheld grip. The adjustable clamp supports smartphones with a width of 5.2 to 9 cm, including iPhone, Samsung Galaxy, Google Pixel, and Huawei models. The mount features 180° tilt adjustment and a cold shoe mount for attaching a microphone, LED light, or other accessories. A mounted smartphone can also serve as a mobile teleprompter for video content creation.

Two center columns and ultra-low-angle shots

The NEEWER LT07 offers the flexibility of working with both a long and a short center column. Both can be mounted in reverse, facilitating macro photography and ultra-low-angle shots. The short column allows you to lower the camera to a height of approximately 7 cm above the ground. An additional hook on the long column allows you to hang a counterweight, improving stability when working with heavier equipment or in challenging terrain.

Included

- Tripod with ball head
- 2-in-1 phone mount and hand grip
