NEEWER SR007 Universal Shoulder Mount with ARCA Mount

The NEEWER SR007 is a modular shoulder mount based on the 15mm LWS rail system, providing enhanced stability during filming and increased comfort for camera operators. The design was created with video creators in mind who use DSLRs, mirrorless cameras, and advanced cinema rigs. With a load capacity of up to 5 kg and extensive accessory compatibility, this model is ideal for both run-and-gun shoots and professional productions.

Arca-Swiss System for Quick Setup Changes

The mount is equipped with an Arca-Swiss quick-release plate, allowing you to mount and remove the camera instantly without the need for constant unscrewing. Compatibility with Arca-Swiss

systems and DJI RS 2, RSC 2, and RS 3 Pro gimbals enables seamless switching between a shoulder rig, gimbal, and tripod. This solution significantly streamlines the workflow during dynamic shoots and allows for rapid changes in filming style.

Stable and Secure Equipment Mounting

The rig features a triple-lock camera mounting system, which enhances safety when working with heavier equipment. The quick-release plate has a non-slip surface and a safety lock to prevent accidental release, while an additional retractable pin increases the stability of the entire setup. Built-in 1/4" and 3/8" mounting screws ensure compatibility with various cameras, camcorders, and camera cages.

Extensive 15mm Rail System

The NEEWER SR007 utilizes the industry-standard 15mm rail system with 60mm LWS spacing, allowing for convenient expansion with additional film accessories. The long rails provide ample space for mounting components such as a follow focus, matte box, lens support, viewfinder, or V-mount battery plate. Protective end caps on the tubes enhance safety by preventing accessories from accidentally sliding off.

Comfort During Long Filming Sessions

An ergonomic shoulder pad made of flexible foam helps distribute the kit's weight evenly and reduces fatigue during long shoots. The pad is contoured to rest comfortably on the right shoulder, improving shot stability and handheld filming ergonomics. Adjusting the position of the components allows you to perfectly balance the rig's center of gravity according to your specific configuration.

Adjustable Handles for Precision Control

Dual handles covered in soft silicone ensure a secure grip and comfortable handling while on the move. The ability to adjust the width and rotate the grips 360° allows you to adapt the setup to different working styles and shot types. This makes the rig ideal for both high-energy dynamic scenes and steady, precise shots.

In the Box

- Shoulder mount body with dual 15mm rails and Arca-type base
- Handle x2
- Crossbar
- 1/4" screw x2
- L-shaped Allen wrench
- User manual

Specifications
