NEEWER BASICS FL10 Portable LED Light

The NEEWER FL10 from the Neewer Basics series is a compact video light designed for photography and video production requiring creative lighting effects. It offers 4 light colors, smooth brightness adjustment from 1% to 100%, beam zoom, and a set of 20 Gobo filters. Its lightweight construction made of aircraft-grade aluminum, built-in 7500 mAh battery, and the ability to operate while charging make the device perfect for both studio and outdoor use.

Lightweight design and convenient operation

The housing, made of aerospace-grade aluminum alloy, ensures durability while weighing just 416 g. The compact dimensions of 155 × 53.5 mm allow the light to fit easily into a camera bag, and the textured grip provides a secure hold and facilitates comfortable one-handed operation. The One-Button Control system allows for quick color changes and smooth brightness adjustment, while an LED indicator shows the current battery level.

Four light colors and precise beam control

Four color modes are available: Warm White, Orange Yellow, Ice Blue, and Glam Red, allowing you to easily adapt the lighting to different scenes. The adjustable zoom range of approximately 10°–60° allows you to change the size and sharpness of the light beam—from a focused spot to a wide, soft light, ideal for portraits, product photography, and background lighting.

20 Gobo filters for creative effects

The kit includes 20 Gobo filters with patterns such as a heart, Saturn, a window, blinds, lightning, dots, and a setting sun. With them, you can easily create striking light compositions without the need for additional projectors or elaborate studio lighting.

Foldable snoot for better light control

The included silicone snoot helps precisely direct the light and limit its spread to the sides. When folded, it is only 2.2 cm tall, so it takes up very little space and works great during transport and when working in confined spaces.

Up to 180 minutes of runtime and USB-C charging

The built-in 7500 mAh lithium battery provides up to 180 minutes of runtime at maximum power. Charging is via a USB-C port, and the ability to power the light while in use allows you to use it even when connected to a power bank or charger.

Three 1/4" threads and a complete kit

The light is equipped with three standard 1/4" threads, allowing it to be mounted on tripods, cameras, camera cages, or selfie sticks. The kit also includes a silicone snoot, 20 Gobo filters, a USB-C cable, and a soft protective pouch, so the FL10 is ready to use right out of the box.

Included

- 1 x FL10 Photography Flashlight
