EAN: 6972185561093

Prekės kodas: 560871

261.99€

Carlinkit TBOX ULTRA 2 Wireless Adapter

The Carlinkit TBOX ULTRA 2 is a wireless adapter designed for vehicles equipped with a factory-installed wired CarPlay or Android Auto system. The device runs on Android 15 and allows you to expand the functionality of the factory screen to include multimedia, navigation, and online apps. With support for wireless CarPlay and Android Auto, the driver can connect their phone without using a cable, and the built-in 4G and Wi-Fi module allows for internet access directly from the device. A powerful Qualcomm SM6350 processor, Bluetooth 5.1, and support for both 2.4 GHz and 5 GHz Wi-Fi bands ensure stable performance during everyday use.

Android 15 and convenient access to multimedia

The device runs on the open Android 15 system, allowing users to access a wide range of multimedia and navigation apps available on the Google Play Store. This makes it easy to launch maps, music players, or streaming platforms without having to rely solely on a phone. The Qualcomm SM6350 chipset, paired with Adreno 619 graphics, ensures smooth app performance and quick switching between functions. Available memory configurations, ranging up to 12 GB of RAM and 256 GB of internal storage, mean the device handles even more resource-intensive apps and offline data storage with ease.

Stable connection and switching between CarPlay and Android Auto

The Carlinkit TBOX ULTRA 2 supports wireless CarPlay for iPhones starting with the 6 model running iOS 10 or later, and wireless Android Auto for phones running Android 11 or later. When the car is started, the device automatically connects to your smartphone, enhancing the convenience of daily car use. An important feature is the ability to manually switch between CarPlay and Android Auto using a physical button on the device's housing. Holding the button down for about 2–3 seconds forces the selected connection mode, which can improve stability in vehicles that have trouble automatically detecting the system.

4G Internet, Navigation, and Additional Storage

The adapter is equipped with a built-in 4G module and the ability to connect to a Wi-Fi hotspot, making internet access possible even without sharing data from your phone. The device supports GPS, GLONASS, and BeiDou positioning systems, which translates to faster position determination and more efficient navigation. An additional advantage is the Micro SD card slot supporting storage media with a capacity of up to 512 GB, allowing you to conveniently store music, movies, or offline maps. The adapter itself has a compact housing measuring 85.5 × 85.5 × 13.55 mm, making it only slightly larger than half a standard smartphone, so it easily fits in a glove compartment or near the USB port.

A compact solution for everyday driving
